Bangalore, Karnataka | +91 7349142334 | asbi1852@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Entry-level AI & Data Science Engineer with a strong foundation in Machine Learning, Deep Learning, Computer Vision, and Generative AI. Skilled in developing AI-powered applications using Python, FastAPI, TensorFlow, and modern AI technologies to solve real-world problems.

EDUCATION

CMR Institute of Technology

Bachelor of Engineering – Artificial Intelligence & Data Science

2022 – 2026

Bengaluru, Karnataka

TECHNICAL SKILLS

Programming Languages: Python, Java

Frameworks: RESTful API, FastAPI, Flask, Streamlit

Libraries: TensorFlow, Scikit-learn, OpenCV, MediaPipe, Pandas, NumPy, Matplotlib

AI Technologies: Machine Learning, Deep Learning, Computer Vision, Generative AI, RAG

Databases: MySQL, SQLite

Developer Tools: Git, GitHub, Docker

Data Visualization: Power BI, Tableau, Microsoft Excel

WORK EXPERIENCE

AI/ML Intern – BLP Industry AI

June 2026 – Ongoing

- Worked with real-world image datasets for annotation, preprocessing, and preparation of training data for computer vision models.
- Implemented and tested computer vision models using YOLO, CNNs, and OpenCV for detection and classification tasks.
- Gained hands-on experience in deep learning model training, evaluation, and optimization in a collaborative AI development environment.

PROJECTS

SmartHire – AI-Powered Virtual Interview & Proctored Assessment System

| *React.js, FastAPI, Python, TensorFlow.js, OpenAI API*

- Developed an AI-powered recruitment platform integrating ATS resume screening, technical assessments, and AI-driven virtual interviews.
- Implemented real-time AI proctoring with face tracking, multiple-person detection, object detection, and tab-switch monitoring to ensure assessment integrity.
- Generated automated interview feedback and candidate evaluation using Large Language Models.

AI Chat with Document Search (RAG) | *Python, FastAPI, React.js, FAISS, Sentence Transformers, Gemini API*

- Developed a Retrieval-Augmented Generation (RAG) application that enables users to upload PDF documents and retrieve context-aware answers through semantic search.
- Implemented PDF text extraction, document chunking, embedding generation, and vector similarity search using PyMuPDF, Sentence Transformers, and FAISS.
- Built a React frontend and FastAPI backend integrating Gemini/OpenAI APIs to generate AI-powered responses with source citations.

Hand Gesture & Face Recognition System

| *Python, OpenCV, MediaPipe, TensorFlow*

- Developed a real-time computer vision system for hand gesture recognition and face identification.
- Implemented MediaPipe and OpenCV for gesture detection and facial recognition using webcams.
- Optimized frame-by-frame processing to achieve accurate, low-latency predictions.

ACHIEVEMENTS & CERTIFICATIONS

- Won **2nd Place** in the **Trope Trivia** at the College Annual Fest (2024).
- Data Science – Wipro
- Generative AI Studio – Simplilearn
- Networking and Web Technology – Infosys Springboard
